Education

- 2016–Present **PhD Electronics and Telecom Engineering**, *The Nelson Mandela African Institution of Science and Technology, Arusha, Tanzania.*
Title: NILM Algorithms for Sustainable Energy in Residential Building.
- 2010–2012 **M.Sc. In Telecommunications Engineering**, *The University of Dodoma, Dodoma, Tanzania.*
- 2006–2009 **B.Sc. in Electronics Science and Communications**, *University of Dar es salaam, Dar es salaam, Tanzania.*

Master thesis

- Title *Design of Wireless Sensor Network for Water Quality Monitoring around Lake Victoria Basin, Tanzania*
- Supervisors Prof. A.N Mvuma

Experience

Research Experience

- 2014–Present **Research Team Leader**, *UDOM-TCRA project (Applying Mobile Technology for Medical Drugs Verification in Tanzania).*
Manage the flow of day-to-day research operations.
Detailed achievements:
- Lead development team to analyze, design and develop the mobile-based medical drugs verification system (DVS) in Tanzania;
 - Organize stake-holders workshop for the Project;
 - Organize and lead project meeting;

2013–Present **Research Associate**, *UDOM-TCRA project (Applying Mobile Technology for Medical Drugs Verification in Tanzania)*.

Manage the flow of day-to-day research operations.

Detailed achievements:

- Identify appropriate anti-counterfeits technologies for pharmaceutical supply chain in Tanzania.
- Prepare and make presentation of different pharmaceutical anti-counterfeits technologies.
- Perform requirements analysis for a tractability system for management of Pharmaceutical Supply Chain in Tanzania.
- Lead development team to design and implement RFID system.
- Lead development team to design and implement Adverse Drugs Reporting (ADR) system.

2012–2015 **Research Assistant**, *UDOM-Vicres Project (Innovative and Integrated Solutions for Governance of Water Resources within Lake Victoria Basin..)*

Conduct research, design and develop integrated ICT solution for Water Resources Governance.

Detailed achievements:

- Identifies Hardware and software requirements for the integrated ICT solution to be used to effectively address governance challenges of water resource around Lake Victoria Basin.
- Prepare and make presentation on Wireless Sensor Networks as one of the ICT solutions to used to effectively address governance challenges of water resource around Lake Victoria Basin.
- Design and implement integrated ICT solution that address governance challenges of water resource around Lake Victoria Basin.
- Lead the hardware development team to develop and implement Wireless Sensor Networks and Mobile sensing for Water Quality Monitoring around Lake Victoria Basin.
- Prepare documentation and presentation for the implemented solution.
- Train stakeholders in Mwanza, Tanzania and Kampala Uganda how to use the developed solution.

Teaching Experience

2013–Present **Assistant Lecturer**, *The University of Dodoma (Department of Telecommunications and Communications Networks)*.

Detailed achievements:

- Teach undergraduates courses (Wireless Networking, Information theory and Coding, Wireless and Mobile Communication and Telecommunication Transmission systems courses).
- Assist senior lecturer in postgraduate courses (Wireless Communication and Applications and Mobile Computing and Data Management).
- Supervise undergraduate final year projects.

2010–2013 **Tutorial Assistant**, *The University of Dodoma (Department of Telecommunications and Communications Networks)*.

Detailed achievements:

- Conducting tutorial sessions and lead lab session to undergraduates students (Signal and Systems, Introduction to Computer Networks)

2010–2013 **Tutorial Assistant**, *National Programme for Information and Communication Technology for Secondary School*.

Detailed achievements:

- Train and Evaluate Secondary School Teachers on ICT related topics.
- Prepare Training Materials

Professional service

External Wireless Sensor Network Journal 2015
Reviewer:

Research Interests

- Wireless Communication, Wireless Sensor Networks, Signal Processing, Machine Learning, Internet of Things, Computational Sustainability, SmartGrid and ICT4D

Skills

Programming C++, Python and Matlab
Languages:

Microcontroller Arduino and AVR
Platforms:

Additional \LaTeX , Sphinx, R, Markdown, Ns-3 and Omnet++
Software:

Conference and Workshop

- Big Data Workshop by Prof. Jennifer Widom. *NMAIST*, 30th Jan to 2nd Feb 2017.
- Design Thinking and Creativity Workshop by Prof. Jennifer Widom. *NMAIST*, 28th Jan 2017.

Poster Sessions

- Anthony Faustine (2014) "Wireless sensor networks and mobile sensing for water quality monitoring and reporting". In Poster Session at Vices Scientific Joint Conference.

Volunteer Work

- Teach children Sunday school with the aim to help teenager realize the potential
- Prepare technical training and workshop on using open-source hardware platform (Arduino) in designing and developing electronic systems
- Prepare training workshop on using \LaTeX for Scientific Writing.

Affiliations

- ACM Student Member
